RE: Supplemental Response to Findings and Recommendations – San Joaquin County
Grand Jury Case No. 0113 (Reclamation Districts)

Dear Judge Holland:

Reference is made to my letter of December 11, 2014, responding to Findings and Recommendations set forth in the San Joaquin Grand Jury Report in Case No. 0113 (2013-2014) was to be rendered by the District's governing body. The referenced response earlier submitted and restated below was reviewed and considered by the Board at its monthly meeting on October 9, 2014, and approved by formal motion. As an officer of the District, the District Secretary routinely authenticates correspondence for the Board of Trustees and thought it acceptable to do so in this instance. The information below supplements the response earlier submitted as to **1.0 Contracting for Services** and, specifically, as to **Recommendation R 1.3** with information as to progress in negotiating a written contract with the District's engineers.

1.0 Contracting for Services. Recommendation R 1.3: Per finding F 1.1, above, no written contract for professional engineering services existed for review. A contract has been set forth which details the scope of professional engineering to be provided. The parties have agreed to all provisions of the agreement and finalized the agreement including provisions related to scope of work. The District approved the contract by formal resolution of January 8, 2015, which written agreement is being circulated for signature. If there is any additional information the District can provide, please let me know.

Very truly yours,

Aleck Dambacher, President of the Board of Trustees
Reclamation District No. 348

Honorable Lesley D. Holland, Presiding Judge
